Disclaimer

The Healthy Web Programme is a remote web testing service for web-interfaced systems conducted by HKIRC. The purpose of this testing service is to assist ".hk" domain users in reviewing the use of security technologies on their websites, including subdomain enumeration based on publicly available sources. This service is non-intrusive and limited to remote checks of the provided domain and its discoverable subdomains. It does not perform active scanning, brute-forcing, or exhaustive enumeration that may interact directly with your systems. Findings in this report are based on the web page state during scanning and may not reflect its current security posture. Please note that the results of this report are not guaranteed to be comprehensive or error-free. This report is provided as it is. For further details of the terms and conditions of the Healthy Web Programme and this report, please refer to https://cybersec.hkirc.hk/en/programme/healthy-web.
